

## Senior Associates

European Antitrust &  
Competition Economics

## About Charles River Associates

---

Charles River Associates (CRA) is a leading global consulting firm that offers economic, financial and strategic expertise to major law firms, corporations, accounting firms and governments around the world. Our experts bring a unique combination of cutting-edge research, state-of-the-art methods and proven experience to bear on our clients' most complex challenges.

CRA's European Competition Practice specialises in providing economic advice on matters of competition policy and regulation. We assist firms and their legal advisors in all types of competition proceedings: firms considering merger and acquisition opportunities or involved in merger control proceedings; and firms undergoing investigations relating to cartels, restrictive commercial agreements, abuse of dominance or state aid. We also provide advice to firms involved in regulatory proceedings and sector inquiries. We offer assistance on the estimation of damages in cartel cases, international arbitration and intellectual property disputes.

We are involved in major antitrust and merger cases before the European Commission and national competition authorities such as France, Italy, Germany and United Kingdom. These span over a wide array of industries, including tech, airlines, energy, health, payments, retail and automotive.

## Responsibilities

---

Successful candidates will become integral members of their case teams. Over time, they will be able to:

- Use their empirical skills (including programming, model building and regression analysis) to conduct statistical analysis using programs such as Stata, R or Python.
- Produce original pieces of analysis for a variety of cases across a large range of industries.
- Quickly familiarise themselves with client datasets such as financial, sales and survey data and identify potential issues that can be used to illustrate economic arguments.
- Interact with clients and communicate economic concepts in an understandable manner while making complicated concepts and arguments approachable to non-experts.
- Assemble compelling evidence from data and research that support our expert opinions and business recommendations while working collaboratively with senior-led teams, including the most respected scholars, specialists and industry experts in the world.

## Qualifications

---

- Candidates should have a strong foundation in microeconomics, preferably with a specialisation in industrial organisation or econometrics.
- Candidates for intern positions should study an economics-related field at either Master or PhD level. The duration of the internship is flexible (usually three to six months) and start dates are flexible as well. Internships are paid.
- Candidates for full-time positions must have an undergraduate degree (Analysts) or a postgraduate qualification at Master (Consulting Associates) or PhD level (Senior Associates) in economics-related fields.

## How to apply

---

Candidates should apply by submitting the online application to <https://ecp.crai.com/careers/>. A CV, cover letter and academic results are expected.
